

Manual Filter Control Valves

Ceramic Moving Disk

- i. Ceramic Disk is sintered at 1680 °C.
- ii. Content : Al₂O₃ ≥ 95%
- iii. Acid and alkaline resistance: Ceramic has excellent stability against Inorganic acid and alkaline at normal temperature

Structure & Performance Features

- Hermetic head faces structure.
- No hard water bypass and can operate with pressure.
- Manual regeneration. Handle could be rotated and assembled within 180°.

Model	
Water Capacity	4 m ³ /h
Handle Material	Plastic
Mount Type	Top Mount
Inlet/Outlet	1" F
Drain	1" F
Base	2.5"-8NPSM
Riser Pipe	1.05" OD
Available Tank Size	6"-12"
Working Pressure	0.15-0.6 MPa
Water Temperature	5-50 °C
Turbidity	< 20 FTU
